PROJECT:

Major Project: Handwritten Digit Recognition

- Handwritten digit recognition is a classic problem in the field of computer vision and machine learning.
- It involves teaching a machine to accurately identify handwritten digits (0-9) from images.
- This seemingly simple task poses several challenges due to the variability in human handwriting, including differences in writing styles, sizes, and orientations.

Technologies used: Python, ML, Deep learning, HTML, CSS.

TECHNICAL SKILLS:

- **Common skills:** Word, Excel, PowerPoint, Windows
- **Languages:** C, C++, Python(full stack), Frameworks-Django, Flask
- **Frontend Technologies:** HTML, CSS, JavaScript

SOFT SKILLS:

- Active listening
- Problem solving
- Patience
- Time Management.

CERTIFICATIONS:

- CISCO-Certified by python Networking Essential

- Infosys-Program Completion Certificate
- Certificate of python internship from Embrizon Technologies
